

Using a Fire Extinguisher

Action

- If a fire starts, follow the emergency procedures outlined by the company.
- You may be able to put out a small fire before it spreads with a fire extinguisher.
- To operate a fire extinguisher, use the PASS method

If the fire is too big or is threatening to block your path of escape:

- Leave the area immediately
- Activate alarm system
- Call 911

Always Use the Proper Extinguisher for the Type of Fire

Silver Canister/Class K fire extinguisher must be used to extinguish fires that are fueled by flammable liquids from cooking, like cooking oils and greases.

P Pull the pin.

A Aim nozzle at the base of the fire.

S Squeeze the trigger.

S Sweep the nozzle back and forth across the base of the flames.
